## WATER FITNESS CLASS DESCRIPTIONS

**Arthritis Water Fitness** This program of gentle water exercise is designed for all ages with arthritis, fibromyalgia, and related conditions, as well as any individual who want to exercise without joint and muscle strain. The soothing warmth and buoyancy of exercising in the warm water pool will help decrease stiffness in joints and improve range of motion. (This class is part of the Active Older Adults Program).

**H2O Interval** This is a great class for anyone seeking a low impact opportunity to exercise. Participants of all ages, skill, and fitness levels are welcome. Jump in and make a splash with this dynamic cardiovascular workout that tones and tapers the entire body. This well-rounded class will concentrate on flexibility, range of motion, strength, and cardio.

**Deep Water Aerobics** This class is a great class for anyone who is comfortable in deep water and needs a no impact class. Work aerobically while toning core muscles as you stabilize your body position in the water. Participants must be comfortable in deep water to participate in this class.

**Silver Splash®** For a soothing exercise environment, try this water exercise class. Classes are held in shallow water, so you don't need to know how to swim. A Silver Sneakers® kick board is used to increase strength, stability, and balance in the water. Members with arthritis or other joint conditions will find the water comforting and the non-impact workout invigorating. This is a great class for those just getting started in water exercise. Participants must be Silver Sneakers participants.

**Deep Water Cadence Running®** Deep Water Cadence Running is a deep-water running class that uses evidence-based, cadence-specific workouts to achieve peak athletic performance. Whether you're training for a run, recovering from an injury or prone to injuries, deep-water running is an impact-free way to engage your entire body while building up your endurance and cardiovascular conditioning. Teresa Triche, a two-time Olympic qualifier, is known for her Deep Water Cadence Running program, which has helped countless runners, soccer players, NBA players, Navy officers and Wounded Warriors veterans recover from injuries and get in the best shape of their lives. There are no pre-qualifications to participate (other than being able to swim comfortably in deep water) and flotation belts are provided by the Y.
